宇都宮大学の「Map of emotions」を元に、大学構内の改善点について自由に話し合い、数名のグループで実際に仮想プロジェクトを時間内に組み立ててみる

Today is the practical workshop again - so more space for you to work in smaller groups and discuss “glocal changes” for Utsunomiya University :-)

20 minutes

Then we'll present together what common things and new insights you found in each group.

>>>

+ Surprise ☺

**Based on the maps of emotions,
what specific changes
would You suggest
to make the space of
Utsunomiya University:**

- **less ugly**
- **less fearful**
- **less boring**
- **more free**
- **more loving**
- **more open**

? ? ? ? ? ?

GLOBAL SCALE

e.g. change function of a building, actions
for a safer street, the new city master plan

LOCAL SCALE

e.g. new bench, planting a tree, fresh art
installation ...

>>>

GLOCAL CHANGES

LIVING (in) UNIVERSITY

Everyone:

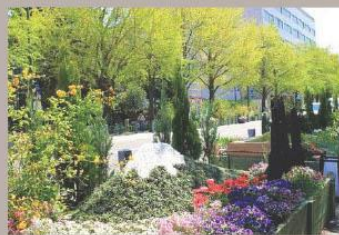

a minimum of 3 and a maximum of 6 specific changes for Utsunomiya (city/University) based on the maps of emotions

the specific form of the presentation is up to You, but I would recommend:

- a photo or picture of the existing location
- a short description of how it should be changed
- possibly add a reference (inspiration) picture of what such a change might look like (what it looks like elsewhere and already works:)

Deadline for submission: January 18

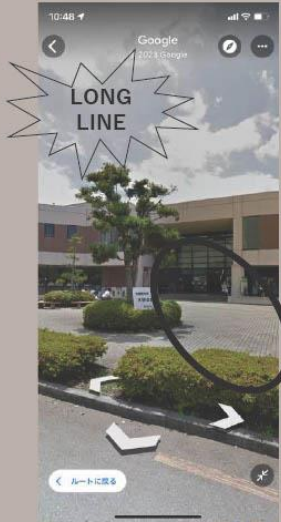

Problem ➡ Solution

+ COLORFUL FLOWERS

Problem → Solution

+ VENDING MACHINE

I have to wait for a long long time in a cold (or hot) weather

For lunch...

えっ、こんなものまで! ユニーク自販機が続々。 | ロコミ | 【公式】兵庫県観光サイト HYOGOナビ | 知っておきたい観光情報が盛りだくさん! (hyogo-tourism.jp)

Problem → Solution

+ LED LIGHT
¥300~500

1. Tree-lined street

- No seasonal changes
 - Change the type of tree (cherry tree etc.)
 - Decorated with illumination in winter

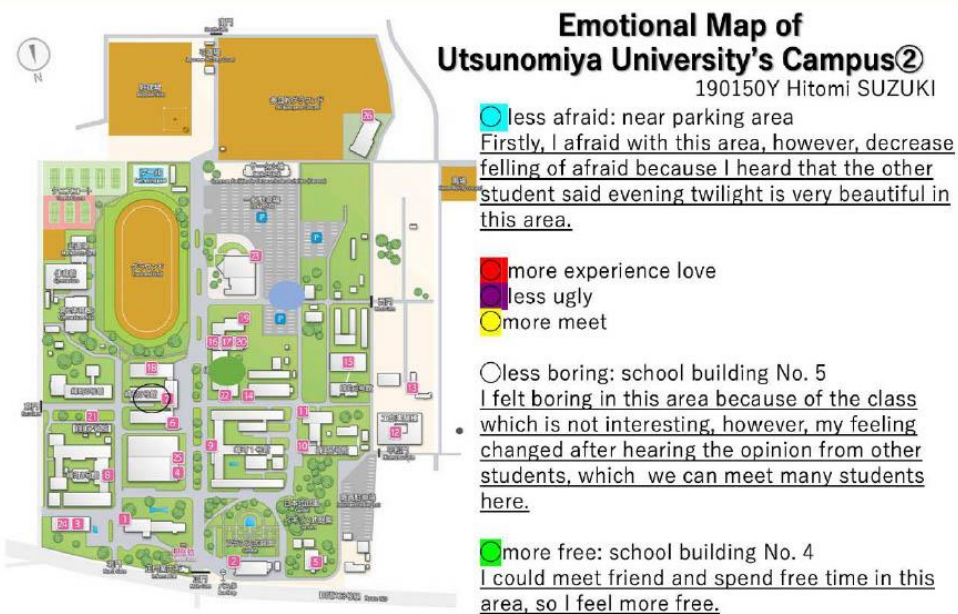

2. Bus stop at the main gate

- Nothing to kill the waiting time
 - More benches and roofs

3. Cafeteria line

- Long line
(sometimes it dose all the way to the crosswalk)
→Decide where to line up so as not to overhang the crosswalk
- Long waiting time
→Hand out numbered tickets and make sure we know how long we have to wait

①自転車道

→とても細く微妙な高さもあるため、自転車が通りづらくなっている。

(DeepL Translator)

(i) Bicycle paths.

→They are very thin and have a subtle height, making it difficult for cyclists to pass through.

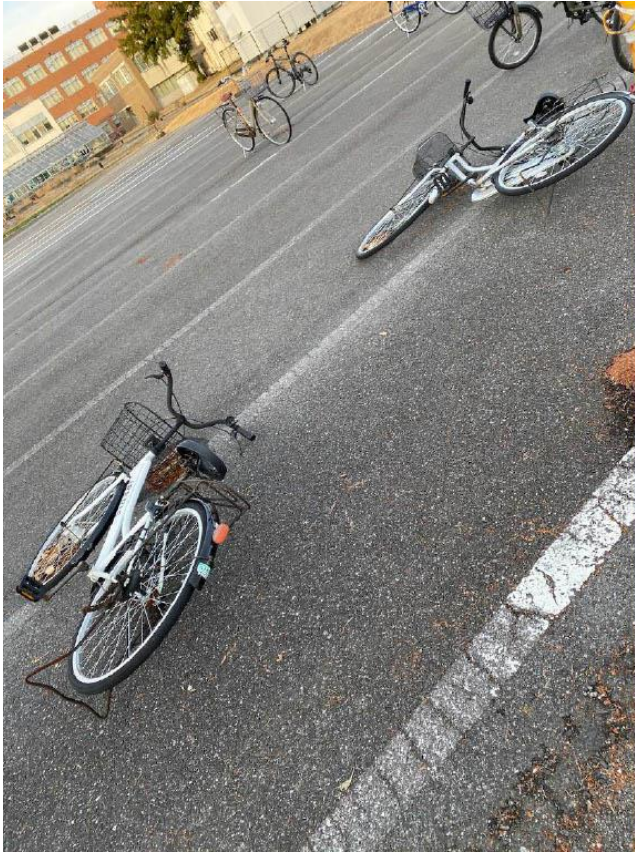

②カラスのケージ

→写真撮影時にカラスがバタバタと動いていて少し不気味だった。夕方暗闇の中ではさらに不気味さが増す。

(ii) Crow cage.

→The crows were flapping around when the photo was taken, which was a little eerie. In the darkness of the evening, it becomes even more eerie.

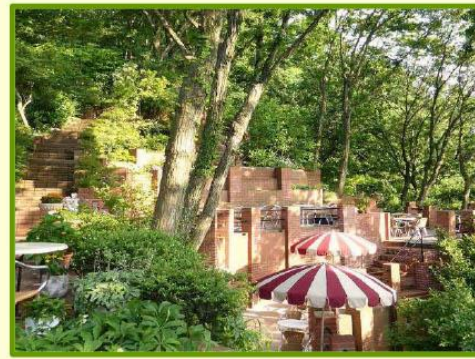

③放置自転車

→校内のあらゆる駐輪場にしばらく放置されているであろう自転車がある。場所を取るだけでなく景観を損なうため、処理していただきたい。

(iii) Abandoned bicycles

→There are bicycles that have probably been left unattended for some time in all the bicycle parking areas in the school. We would like them to be disposed of as they not only take up space but also detract from the landscape.

ITSUKI GARDEN | 樹倉 樹ガーデン【公式】(itsuki-garden.com)

LOCAL SCALE

The English-style garden on campus does not get much sun and the grass is not well-maintained, which creates a frightening image. It would be a shame to have benches that no one uses, so I thought a garden terrace seating area would create an enjoyable atmosphere. Also, as shown in the photo, the garden could be used as an environmentally friendly place by making use of the greenery as it is.

コペンハーゲン大学に設置した集合施設「Køpm. Bikes Plads」。「自転車の丘」と呼ばれるユニークな設計が特徴。Webマガジン「AXIS」 | デザインのWebメディア (axismag.jp)

GLOBAL SCALE

Bicycle parking needs a roof for when it rains. This bike storage area is not used much and just remains as a large place. However, it would be a waste if it is not used effectively. Therefore, instead of installing roofs one by one, a large, sturdy concrete roof will protect the bicycles from the rain and prevent rust from forming. Also, it is dangerous at night because of the lack of light and darkness. It might be a good idea to install a small light under the roof.

【プロが指図】庭におしゃれなガゼボを建てよう！ 素敵な景観もたっぷり紹介！Hello Junior NOTE【レポート】

LOCAL SCALE

Located next to the English Garden, this arched object is now in such a state that it is hard to tell what it is. Therefore, I think it would be a good way to create a fashionable resting place called a gazebo. If people who come to the university for a walk can take a child rest, they will be able to take a break while admiring the view from a vantage point.

Less afraid

I felt afraid when I pass the main gate because I didn't know my new life. But now I can experience many good things. Therefore, I feel little afraid compared to 2 years ago. I think experience can reduce the feeling of afraid.

Less boring

To put the advertisements of event in the class. People in international studies usually walk between 4th and 5th hall. If they can notice the good information in the class, they will be more exciting.

Less ugly

Some people say that the road is not bright and clean. So, they feel ugly. It is a good idea to build a street lamp on the road.

Specific changes for Utsunomiya university

210187K Hiroto Yuda

Bicycle parking lot

To be less ugly

-Set up the bicycle parking lot with a roof and partitions in addition.

Parking area

To less ugly and freer

-Set up a second small school cafeteria in the parking area that is rarely used.

Narrow center road

To less ugly and less afraid

-Paint a line to divide the way between bicyclers and pedestrians.

- Install bicycle parking because bicycles fall over on windy days.

- Install mirrors at intersections to prevent accidents.

- Install more electrical lights because it is dim and creepy at night.

Utsunomiya
University

In addition to the heavy traffic, it is difficult for bicycles to pass through.

✦ the road in front of Building No. 5

safety

- abolish the slope and put up a sign
- eliminate the gap between the slope

✦ 5th floor, Building No.4

There is a stain on it.

Glazing, bright, open

↖ south gate

There are few people and it is too narrow to pass by bicycle.

Convenience
lovely

Map of emotion

220182y
YUKINE YO

- ① I'm afraid
- ② I'm feel danger
- ③ my favorite place

That is the gate that I always use when I enter school.
It is convenient because it is much closer than entering through the main gate.
However, the gate is smaller than the main gate and the space to enter is always small.
Therefore, it is very dangerous to enter by bicycle.

Improvement point

As an improvement plan, the gate will be opened more widely so that many students can enter safely.
Also, as there is a lot of traffic, I will ask them to post while paying attention to the time of day as much as possible.

This is a road that I often use when I go to class. We often teach at Building 4 a year. When you pass, you need to check your car or bicycle. It's very scary because if there's a lot of traffic, you'll be almost run over.

Improvement point

Many students use the street there, so I think they should be able to pass safely. For example, you can turn on security guards or ask them to slow down properly during a time when there are many cars. Also, be careful not to cross while talking.

This place is a French-style garden from the Taisho period that was selected as a national registration monument.

It is also designated as a "Utsunomiya Hyakkei" in Utsunomiya City and is popular among many citizens as a resting place.

Improvement point

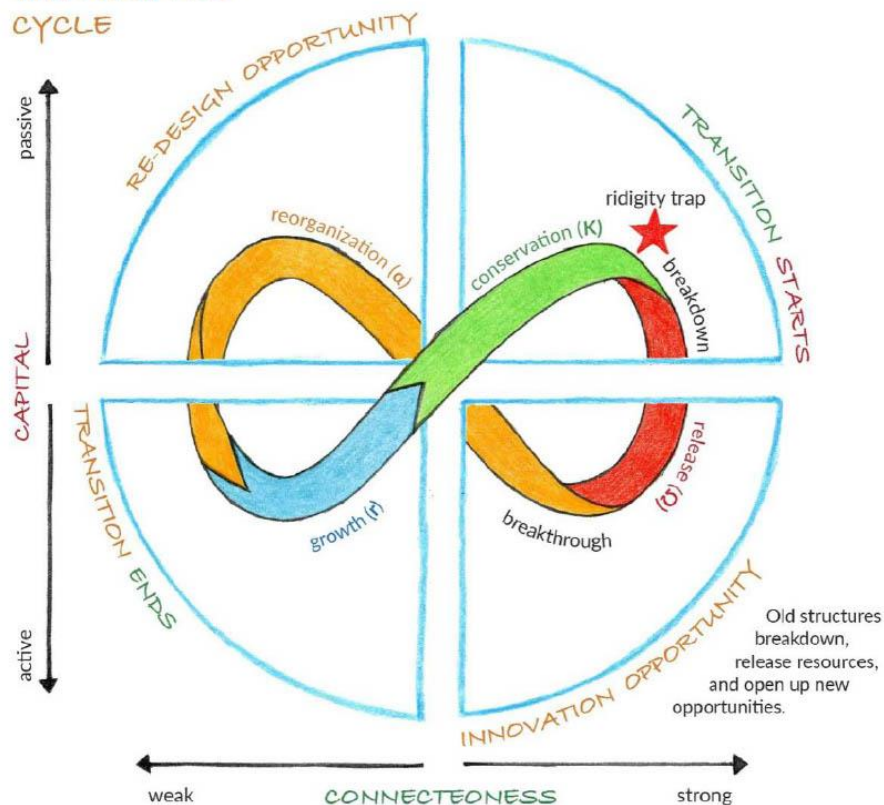

I would like to make this a place where more people can enjoy themselves.

We should create a good atmosphere so that people other than Mock Utsunomiya University can come easily.

Feeling (of) the season not only in haiku

THE ADAPTIVE
CYCLE

Adaptive Cycle model

A model of change in complex systems developed by an interdisciplinary group of hundreds of scientists, which applies generally to complex adaptive systems, ranging in size from cells to ecosystems, and is equally applicable to human systems, such as markets and industries. According to the model, every complex system passes through a life cycle consisting of four phases: **growth**, **conservation**, **release** and **reorganization**, which initiates the next cycle.

Growth: Spring and Early Summer

Conservation: Late Summer and Autumn

Release: Early Winter

Reorganization: Late Winter and Early Spring

PROJECT →
